

Which Industry Fits You Best?

Packaging Engineering Consulting

Becoming a packaging engineer comes with many choices. One of the more important ones is choosing to work in an industry that fits the engineer's personality. Some of our engineers that have experienced working in multiple industries thought it would be beneficial to provide an overview of each to help make the choice easier for engineers entering the field or considering a change.

CONSUMER PACKAGED GOODS INDUSTRY

Experience with Many Different Packaging Types

Dynamic Workload

LIFE SCIENCES INDUSTRY

Larger Project Teams

Multiple Year Project Duration

Cautious Approach Due to Regulatory Requirements

High Level of Detail on Specific Packaging Types

Focused Workload

Still not sure? Work for Adept Packaging & Try Them All

When working for a Packaging Engineering Consultancy like Adept Packaging, engineers don't have to choose. Because we have global clients in the Life Science, CPG and Food and Beverage industries, our associates have the option of experiencing all three industries to see which fits them best.

Adept Packaging believes that packaging is more than a container-- it's a powerful vehicle, connecting iconic brands to consumers, safely transporting life-saving medicines and protecting the food and drinks we consume every day.

Adept is the leading expert for packaging engineering and serialization, providing teams with flexible, scalable service through staffing, engineering services, business processes and technology. Our portfolio of accelerators and products capture and create value from packaging.
